

TAMS 82622 GPIO For Red Hat Enterprise Linux

Take advantage of the flexibility and versatility of GPIO with the speed of PCI.

The TAMS 82622 card offers:

- True 3.3V and 5V PCI support
- Software configuration - no DIP switches.
- 16 bit data exchange
- Extra status and control lines
- Choice of handshake methods
- Data-latching options
- Selectable data width and polarity.
- Easily removable pull-up resistors

GPIO for Red Hat Linux

TAMS next generation PCI GPIO card, the 82622 now supports hyperthreading and multi-processor configurations. Based on HP's original definition of the 98622 GPIO standard, TAMS 82622 card is a superset of the HP/Agilent interfaces and meets all the original specifications. TAMS 82622 is fully compatible with TAMS [BASIC for Linux](#) and TAMS [I/O Library](#) for Linux.

System Requirements

- 1 available PCI slot
- Red Hat Enterprise Linux
([Click here to see supported kernel information](#))
- TAMS I/O Library for Red Hat Linux. (included)

GPIO Card	TAMS PCI GPIO Interface Card for Red Hat Linux Includes TAMS I/O Libraries for Red Hat Linux Part #: 82622	
GPIO Card with Bail Locks	TAMS PCI GPIO Interface Card for Red Hat Linux Includes TAMS I/O Libraries for Red Hat Linux Part #: 82622-BAIL	
GPIO Cable	Compatible with all TAMS, HP and Agilent GPIO interfaces. 5 meter total length. 50 pin Centronics connector on one end, unterminated on the other end. Includes mounting hardware kit Part #: 622-001	

Weight (card only) 1.5 oz (42 mg)

Shipping Weight 16 oz (455 mg)
